COURSES & TRAINING

- Arduino & Robotics
- Knime Analytics platform
- Computer Vision
- n8n Workflow Automation
- HTML & CSS
- Machine learning & Data science
- AWS Cloud Computing
- PCEP – Certified Entry-Level Python Programmer

LANGUAGES

Arabic - Native
English - Professional

EDUCATION

Applied Science Private University

Bachelor of Data Science & AI
currently 3rd year

Projects

HireBot (python)

Developed a recruitment platform with an AI-powered interview assistant and automated hiring workflow.

Autonomous Sumo Robot (Arduino IDE)

Programmed the core decision-making and spatial awareness logic for an autonomous robot, processing real-time sensor data to execute physical maneuvers.

Qaddak (n8n Workflow Automation)

Built a smart food waste reduction app using n8n; automated portion calculation, donation routing, and user engagement with a gamified impact system.

Diabetes Diagnostic Predictor (Python)

Developed a predictive model using medical indicators; applied preprocessing, visualization, and multiple classification models.

Heart Failure Risk Analysis (Weka, Data Mining):

Applied unsupervised learning techniques (clustering) to identify patient risk groups and validated results using association rules.

Bank Marketing Prediction (R)

Built a model to predict customer conversion and analyzed behavioral patterns.

ACHIEVEMENTS

- 1st Place – Sumo Robot Competition
- 3rd Place – Machine Learning Competition (Twice)

VOLUNTEERING

- **English Language Olympics 2025 – Event Organizer:**
Supported organization and execution of competition activities.
- **Robofight 2026 – Event Organizer:**
Planned and coordinated logistics for a university robotics competition.

TECHNICAL SKILLS

Languages: Python, R, Java, C++, SQL, Scala

Areas: Machine Learning, Data Analysis, Visualization, Automation (n8n), Robotics, Supervised & Unsupervised Learning

SOFT SKILLS

- Teamwork & Leadership
- Problem Solving
- Adaptability
- Public Speaking
- Work under stress
