Summary

Data Science and AI student with hands-on experience in machine learning, data analysis, and computer vision. Passionate about extracting insights from data and building intelligent solutions. Seeking an internship to apply and expand my skills.

Education

- Applied Science Private University (2023-2027)
- 3rd year student in Data Science and Artificial Intelligence
- GPA: 78.6 (Very Good)
- Expected Graduation: 2027

Courses

- Data Analysis
- Machine Learning & Data Science
- Natural Language Processing (NLP)
- AWS Cloud Fundamentals
- Computer Vision
- Workflow Automation (n8n)

Languages

- Arabic (Native)
- English (Professional)

Certificates

- Certificate of Achievement – 3rd Place, Datathon Competition
- Certificate of Achievement – 3rd Place, Computer Vision Competition
- Arduino Course Certificate
- Participant – Machine Learning Competition
- Participant – Hack Ramadan Jordan 2026
- PCEP- Certified Entry-Level Python Programmer

Projects

Market Analytics and Obesity or CVD risk- Data Mining

- Applied data mining techniques and perform association rule mining, classification, and clustering to extract meaningful patterns and insights from data.

Graph Creation and Analysis - Big Data Analysis

- Reviewed and summarized research articles related to big data.
- Analyzed and grouped similar

Mental Health Statistical Analysis - R

- Performed statistical analysis on mental Health dataset using R.
- Applied T-Test, ANOVA, Chi-Square, and correlation techniques.
- Created charts and visualizations

Skills

Technical Skills:

- Python
- R programming language
- KNIME
- HTML & CSS
- WEKA
- Data Visualization (Tableau)
- SQL
- JAVA
- C++

Soft Skills:

- Teamwork
- Time management
- Work under stress
- Problem Solving
